

GARMA, C.B. GARMA,

GARMA, C.B. is a Spanish company with twenty five years experience in the sector. We are dedicated to the design and production of fashion ready garments in Asia, facilitating comprehensive solutions to help fashion companies in the transition towards a more sustainable industry.

IDEA

This project arises from a group of sustainability aware professionals in the fashion supply industry who consider that there is another way to understand the textile industry and that they can contribute with their knowledge and experience to improve the negative impact that the current model entails to the environment and society.

OBJECTIVE

SUSTAINABLE FASHION
SUSTAINABLE FASHION

ETHICAL PRACTICES
ETHICAL PRACTICES

RENTABILITY
RENTABILITY

RESPONSABILITY
RESPONSABILITY

The objective is to become a reference supplier of sustainable fashion that guarantees to our clients that ethical practices are being used at all stages of the production and purchasing process. We try to harmonize the demands of a competitive market with the sustainability policies and corporate social responsibility of the companies.

It is possible right now a model that, without compromising profitability, respects the environment and people. We cannot wait for a new production paradigm to emerge. There are many measures and practices of immediate application that can significantly reduce the damage that the current production system is causing to the planet.

VALUES

Traceability and ethics in the purchasing processes. We are aware that transparency is an indispensable condition and foundation for sustainability.

Traceability

An extensive industry experience has taught us the importance of respecting the due dates and quality requirements of our customers.

Efficiency

We have teams in Spain and Portugal, which allows us to communicate without cultural barriers, providing a better service and closeness to our customers in Europe.

Proximity

Counting on a trajectory of about 25 years in Asia. We are therefore accustomed to face and solve any types of production problems and able to respond to the most demanding standards and requirements

Reliability

Working to get ahead of the times and be able to offer the latest advances in technology and product development. Our team is on constant training to offer our customers unique and competitive products..

Innovation

INTEGRAAL SERVICE

We count on designers and pattern designers that offer brands collections and flexible proposals, based on the trends and the particular needs of each of our clients.

Design

Production follow-ups in Asia, with quality controls on site and updated client reports, from the fabric production up to the final

Production

Our experienced team monitors each process to make sure that factories understand by and actually carried out customer approvals and indications.

Control

A local office in Bangladesh with 45 people (merchandisers, quality controllers, specialists in international trade management) that control production orders and provide us a thorough knowledge at ground level

Management

We have thoroughly studied the sustainability-competitiveness equation, looking for reliable and competitive suppliers in Asian markets such as Bangladesh, China, India or Pakistan.
